## ACADEMIC & PERSONAL PROJECTS

**Project: Restaurant Table Reservation Management** (Group Course Project)

GitHub: [github.com/bang12bang007/QuanLiDatBanNhaHang](https://github.com/bang12bang007/QuanLiDatBanNhaHang)

Role: Java Developer. Participated in requirements analysis, system architecture design, and functional testing.

Duration: Jan 2024

Description: Developed a desktop application using Java to help restaurants manage both online and in-person table reservations. Implemented features such as booking creation, cancellation, customer management, and real-time table status reporting.

**Project: Video Gesture Control** (Individual Course Project)

GitHub: [github.com/SophistMan12/Video-Gesture-Control](https://github.com/SophistMan12/Video-Gesture-Control)

Role: Developer – Machine Learning / Computer Vision

Duration: Jan 2025

Description: Built a real-time video player controller using hand gesture recognition via webcam. Designed and trained a deep learning model and optimized the image processing and inference pipeline to ensure low-latency interaction.
